UI/UX Designer · UX Researcher · B.Tech Student

COVER LETTER

Dear Hiring Manager,

I am a B.Tech student with a keen interest in **UI/UX Design**, **UX Research**, and interaction-led digital experiences. I have been actively building my knowledge through reading, research, and self-driven case studies, focusing on product thinking, user-centered design, and immersive storytelling — while also gaining hands-on experience with frontend development.

I am deeply fascinated by how users interact with products and the reasoning behind design decisions. Recently, I designed UX case studies rendered in HTML to create interfaces that are clearer, more visually structured, intuitively organized, and cinematically engaging. These projects have helped me sharpen my skills in **Figma**, wireframing, prototyping, usability thinking, and visual storytelling.

For me, UX is a blend of psychology, creativity, and problem-solving. I am especially drawn to understanding user behavior, improving the digital experience, and crafting intuitive, meaningful products that leave a lasting impression.

I am looking for an opportunity to learn from seasoned designers and researchers, while contributing my curiosity, dedication, and willingness to grow. I would be genuinely excited to join your team and develop real-world experience in product design and user research.

Thank you sincerely for considering my application. I would love the opportunity to speak with you about how I can contribute to your organization.

Sincerely,

Akuri Venkata Surya Varun
