PROFESSIONAL SUMMARY

Motivated and creative Frontend Developer and Computer Science undergraduate at KL University, passionate about building impactful digital experiences. Proven ability to design and ship real-world web applications — from immersive game mechanics in vanilla JavaScript to wellness-tech platforms — while continuously upskilling through industry-recognized simulations and certifications. Adept at combining clean UI design principles with functional development to deliver user-centric, ATS-optimized, and performance-ready solutions.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+) | HTML5 | CSS3 | React.js

Design & UX: Web Design | UI/UX Research | Wireframing | Responsive Design

Data & Analytics: Data Analytics | Spreadsheet Analysis | Data Visualization

Tools & Platforms: Git | VS Code | Figma | Forage Simulations

Soft Skills: Problem Solving | Ownership Mindset | Rapid Learning | Creative Thinking

PROJECTS

NEON PULSE: ARCHITECT — Cyberpunk Survival Shooter | 2025

Tech Stack: Vanilla JavaScript, HTML5 Canvas, CSS3

- Engineered a fully playable browser-based survival shooter from scratch using pure JavaScript — no frameworks or game engines.
- Implemented real-time collision detection, enemy AI spawning loops, and player health mechanics, demonstrating strong algorithmic thinking.
- Designed immersive cyberpunk UI and visual assets, achieving a polished game loop with progressive difficulty scaling.
- Publicly launched the project, generating community engagement and showcasing end-to-end ownership from concept to deployment.

INNER ROOT — Technology, Wellness & Culture Platform | 2025

Tech Stack: HTML5, CSS3, JavaScript, Responsive Design

- Conceptualized and developed a full-featured website bridging the gap between mindfulness, cultural storytelling, and modern technology.
- Built a multi-section responsive layout with smooth navigation, optimized for both desktop and mobile users.
- Integrated storytelling-driven content architecture to enhance user engagement and session time on the platform.

KER-1934 — Online Platform for Skill Certification Tracking | 2025

Tech Stack: JavaScript, HTML5, CSS3, React.js

- Designed and developed a centralized web platform enabling users to track, manage, and showcase professional certifications and skill milestones.
- Built dynamic UI components in React.js, ensuring seamless state management and real-time data rendering.
- Addressed a real-world pain point for students and professionals managing multi-platform learning journeys.
- Structured the platform with scalability in mind, following modular component architecture best practices.

EDUCATION

B.Tech — Computer Science & Engineering | 2024 – 2028

KL University, Vaddeswaram, Andhra Pradesh | **CGPA: 7.57 (present)**

- Relevant Focus Areas: Web Design, Data Structures, Software Engineering, UX Fundamentals

CERTIFICATIONS

- Learn React — Scrimba | Mar 2025
- Data Analytics Job Simulation — Deloitte Australia (Forage) | Jun 2025
- UX Design Advanced Job Simulation — Lloyds Banking Group (Forage) | 2025
- Product Design Job Simulation — Accenture North America (Forage) | 2025

- Teradata Aurora — Data Analysis — Forage | 2025
- JavaScript Programming Certification — Online Platform | 2025

ADDITIONAL HIGHLIGHTS

- Actively engaged with BRAINOVISION SOLUTIONS INDIA PVT. LTD. and KL Youth Policy Lab — demonstrating strong community involvement and policy awareness.
- Consistent self-learner completing 6+ industry simulations and certifications in under 12 months alongside full-time B.Tech studies.
- Launched multiple public-facing projects from ideation to deployment, showcasing product thinking beyond academic coursework.
- Maintaining an active LinkedIn presence documenting learning milestones, project launches, and tech community engagement.
